

## Hospital Information Kiosk Systems

*Brookwood Systems' Hospital Information Kiosk Systems will allow you to deploy information kiosks at strategic locations throughout your campus to improve your patient service quality and operating efficiency.*

### Provide Interactive Way-Finding Maps with Step-by-Step Directions

Patients and visitors will be able to navigate their way around your campus easily with a fully interactive way-finding map.

### Provide Browsable Personnel and Departmental Directories

Use browsable directories to help patients and visitors quickly locate a doctor or department.

### Provide Browsable Event Calendars and Announcement Pages

Browsable event calendars and announcement pages help keep everyone informed about the current events and occasions at the hospital.

### Display Local Points of Interest and Services

Provide a list of local shops and services for visitors.

### Instantly Display an Emergency Exit Route

In case of emergency, quickly turn any kiosk into an emergency exit route map with just a single touch.

### Track System Usage and Generate Reports

Optimize your staff's time by tracking system usage and allocating resources to high traffic areas.
